Corporate Overview

Overview

AKRO IT Technologies was established in 2020 as an IT staffing consultancy with a focus on the emerging or re-emerging markets that are bracing covid-19 challenge. Our team of experts work across for wide range of industries and for different verticals to provide services to leading MNCs and IT companies globally with utmost dedication when almost everything was unpredictable

Why Choose us ?

- 1 **Affordability**
- 2 **Commitment**
- 3 **Ethical**
- 4 **Compassion**

Services

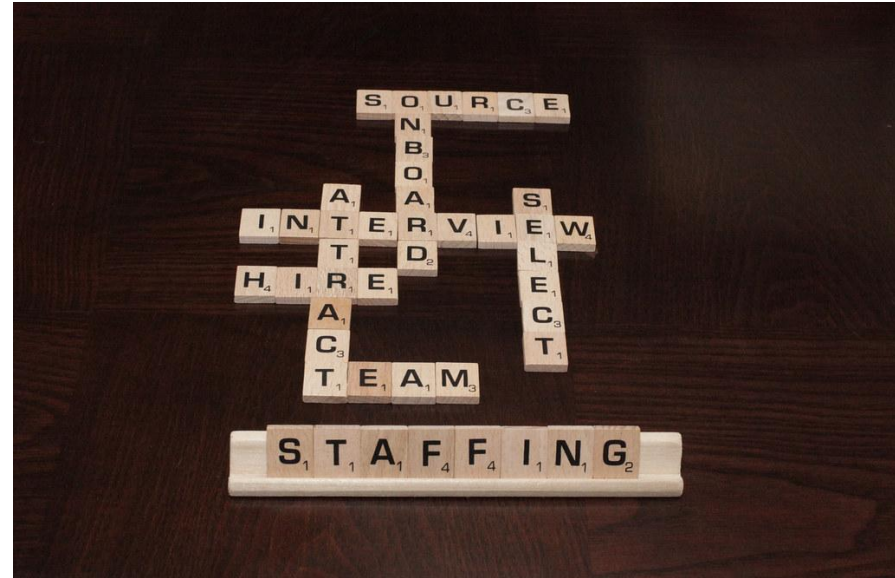

- 1 Staffing
- 2 Cloud
- 3 Automation & AI
- 4 Internet Of Things
- 5 Digital Transformation

Staffing

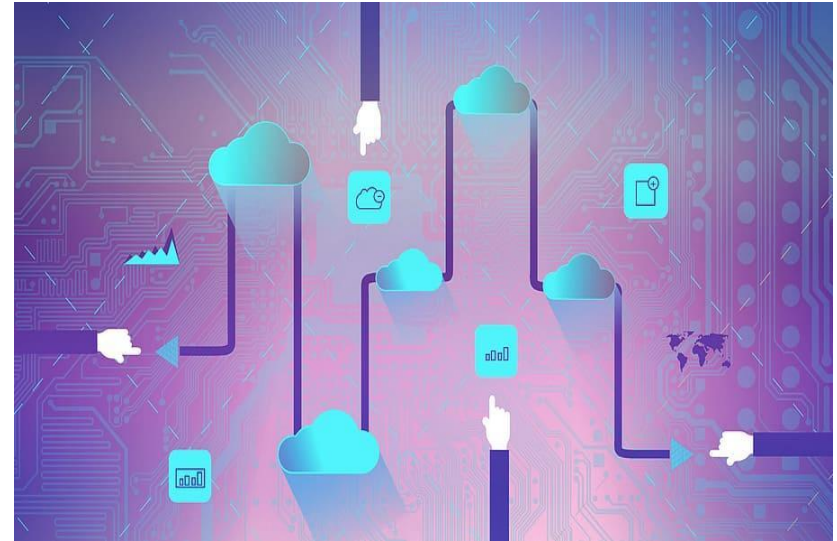

Staffing enables clients to find talented resource for a specific time or until the project is finished. Clients choose to have resources on third party payroll due to complex payroll process and perks given to resources when they are directly employed. This benefits clients to reduce costs and save time.

Cloud

Looking for evolved and seamless technology process? Our cloud consultants are experienced professionals who would empower your team in selecting the best cloud solution that suits your company's needs. We further enhance the process with complete maintenance of cloud applications- migration, development, and implementation.

Automation & AI

Be a part of the disruptive advances with our innovation Automation & AI solutions. Our perfectly intelligent solutions ensure to improve your company's overall performance. Our hardware and software automation accelerates reliable and efficient capabilities that drive rewarding experiences.

Internet of Things

Collect and share the data connection between the internet and physical devices. We provide efficient and smooth data transactions between devices. We enable smart configurations that makes your IoT devices smart and intelligent to function. Our solutions also provide you with analytics that enables improvisation.

Digital Transformation

Transform your Organization's redundant and traditional offline systems to a dynamic and functional operational system with our perfect Digital Transformation process. We offer fortified and easy-to-integrate digital functions that determine high-quality output. Our time-friendly and valuable transformation plans empower your business progression with convenience.

Industries

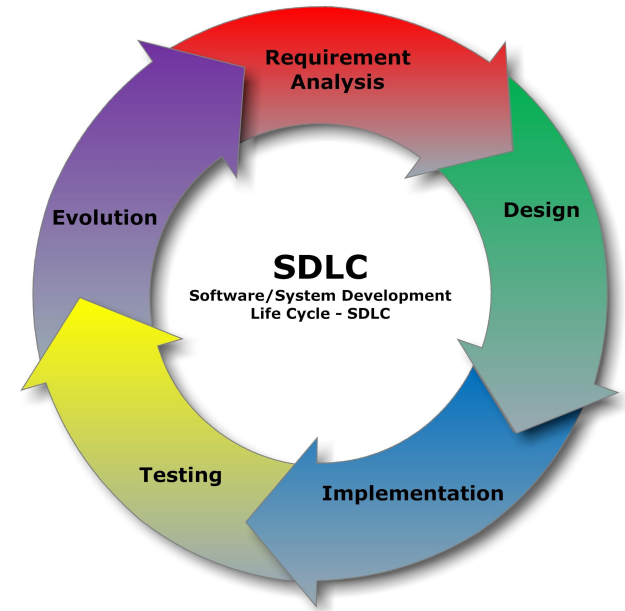

- 1 INFORMATION TECHNOLOGY
- 2 BANKING AND FINANCIAL SERVICES
- 3 ECOMMERCE
- 4 HEALTHCARE
